

TE3 MOVE

for guided, focused training and monitoring of development

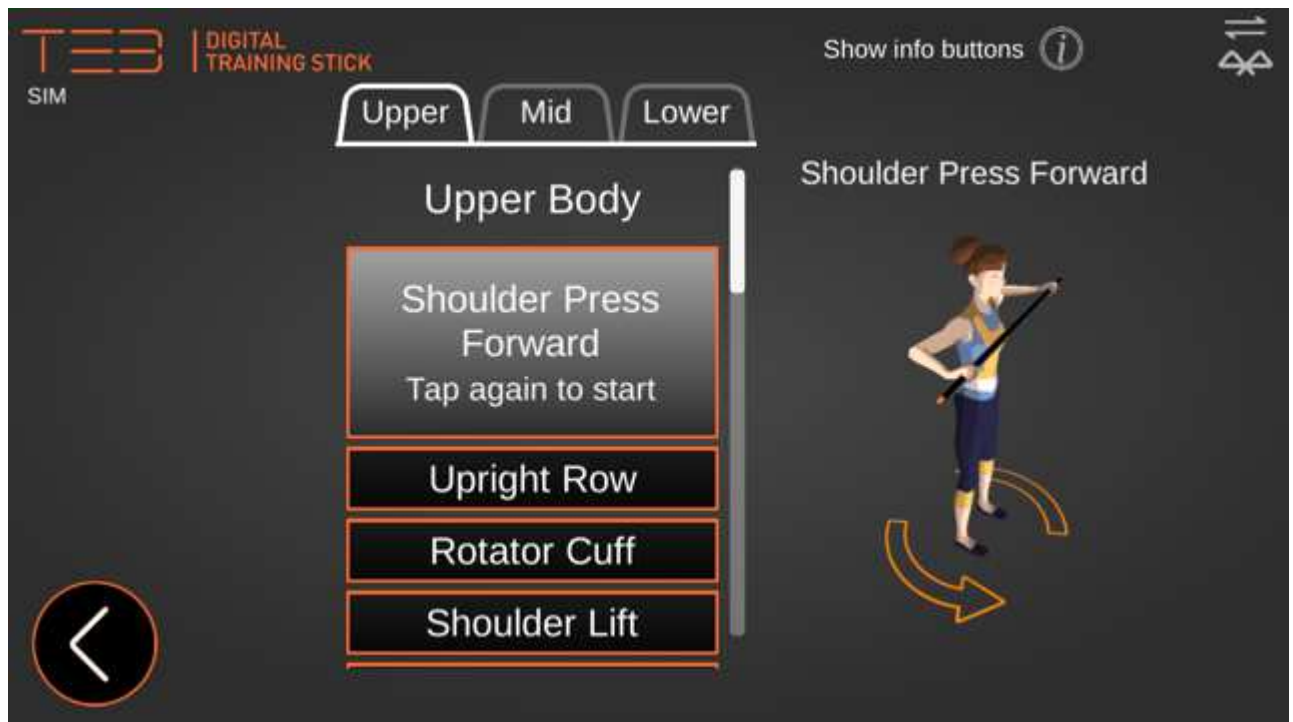

TE3 MOVE is a great choice for active sport hobbyists and home users. With TE3 Move you can learn to exercise in better and safer positions, so training becomes more efficient – and motivating!

Why TE3 Move?

TE3 MOVE,

- Guides your movement with vibration feedback and gives focus on training
- Helps you figure out your body mobility and learn to control your body better by vibration feature
- Warns you if you exceed your optimum range of motion
- Helps you get started: ready-made, guided exercises and programs
- Tracks your development in a simple visual way
- Allows you to export and send the results to the coach and/or therapist: intensify home training
